Education

University of Waterloo & Wilfrid Laurier University Sep. 2026 – Apr. 2031
Double Degree: Computer Science (Waterloo) & Business Administration (Laurier) *Waterloo, Canada*

Technical Skills

Languages: Python, JavaScript, SQL, Racket
Frameworks: React
Developer Tools: Jenkins, Bitbucket, Git, VS Code, Visual Studio, Linux, PyCharm, MySQL
Libraries: pandas, openpyxl, Matplotlib, pysdmx
Spoken Languages: English and French

Experience

Software Developer Jan. 2026 – Apr. 2026
Independent Contractor *Remote*

- Built an Excel parser for a UN statistician, reducing a 3-hour task to under a minute using Python (pandas and openpyxl)
- Refactored a "quality analyser" script using pysdmx, replacing raw XML manipulation

Software Developer - Intern Jul. 2025 – Dec. 2025
Ciena *Kanata, Canada*

- Created a form based GUI that generated deployment configs in real time, letting developers configure 100+ microservices, YANG models, protocol ports (REST, ZMQ), and Git metadata, replacing error-prone hand-editing
- Developed React based devtools used by 30+ developers across multiple departments
- Integrated Bitbucket and Jenkins APIs into a React app for diagnostics on microservices
- Led monthly demos of new tooling to multiple engineering teams, using feedback to guide follow-up development

Ski Instructor Winters 2024 – 2026
Swiss Mountain Sports & Camp Fortune *Crans-Montana, CH & Gatineau, CA*

- Taught 500+ lessons in English and French to clients of all ages and skill levels on groomers, off-piste and in the snowpark
- CSIA Level 2, Standard First Aid + CPR

Math and CS Tutor Dec. 2024 – Present
Lycée Claudel *Ottawa, Canada*

- Weekly sessions tutoring high schoolers fundamental concepts in both math and computer science

Projects

Minecraft Maps, Servers and Bots | *JavaScript, Skript, Discord, Mineflayer.js* Jun. 2020 – Present

- Published Minecraft puzzle maps with 50,000+ downloads
- Hosted a low-latency Minecraft server for competitive speedrunning on Ubuntu 20.04, with over 200 runs held
- Custom coded several servers in Skript and maintained an active player base
- Developed a multiplayer Minecraft problem solving chat-bot in JavaScript using the MineFlayer SDK

Mini Games | *JavaScript, HTML, CSS* Jun. 2023 – Jun. 2025

- Built and hosted a movie trivia site, a whack-a-mole game, and Do-o (a Wordle-inspired word guessing game)

Desktop Projects | *Python, pyautogui* Jun. 2024 – Apr. 2025

- Programmed various automation bots for websites, messaging apps and games with Python

Awards

Nuit du C0de | 1st place (2023), 2nd place (2022) in a 6-hour Python programming jam

Kangaroo Math Contest | Top 0.1% (2020), ranked 56th of 90,000 participants
